EXAMINER'S AMENDMENT/COMMENT

AND

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. Prosecution in this instant application is reopened in view of applicant's response in papers dated 7 April 2006.

2. The following is an examiner's statement of reasons for allowance: the prior art does not show or reasonably teach/suggest to one of ordinary skill in the art to which said subject matter pertains to, the combination of structure in a filter apparatus:

i) which guides a portion of the internal fluid stream (the term 'internal' interpreted as per applicant's remarks in sections 5-7 {V-VII} of 'Appellant's Brief' {papers dated 7 April 2006} to mean the "fluid stream" contained in the "enclosure") through a recirculating filter and a filter chamber, which is located immediately downstream of the recirculating filter; or

ii) which diverts a portion of the internal fluid stream through a recirculating filter and fluidly mixing the internal fluid stream portion and an external fluid stream (the term

'external' interpreted as per applicant's remarks in sections 5-7 {V-VII} of 'Appellant's Brief' to mean the "fluid stream" which emanates externally of the "enclosure") with a filter chamber disposed within the internal fluid stream immediately downstream of the recirculating filter.

Re claim 20; As argued by applicant, the scope of the claims is to be read on the specification and insubstantial variations thereof. The specification defines the instant means for filtering contaminants in a single figure 4 in the Drawings (and its associated written description).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
